

GENERAL CATALOG

COMPANY INFORMATION

Leader Munitions, as Nato Certificated company, is an established ammunition manufacturer operating fully integrated production lines. The company specializes in standard FMJ projectile core and cartridge case production, supported by high-capacity press lines, CNC machining centers, and automated manufacturing systems. Leader Munitions ensures consistent quality, reliability, and industrial-scale production capability.

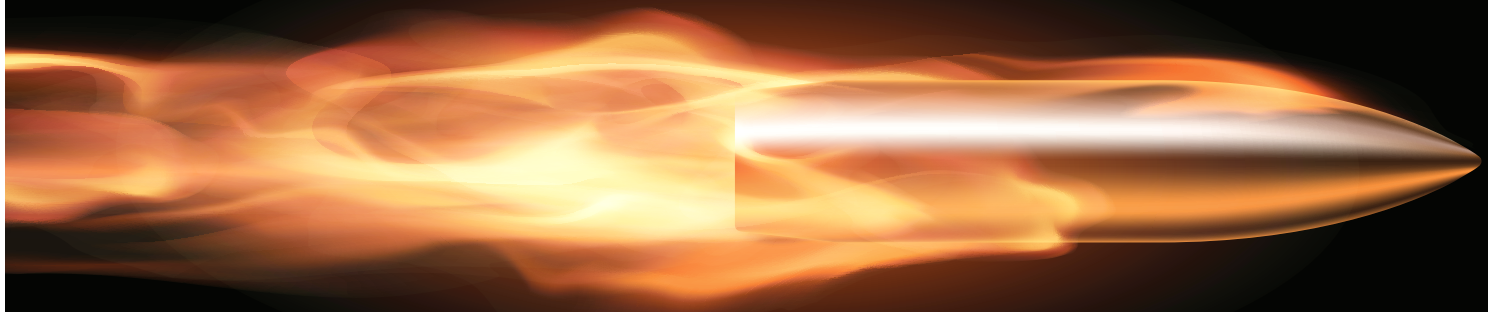

Tor44 is a technology-focused manufacturer specializing in high-performance copper-plated projectile solutions. With expertise in electroplating processes, material science, and precision engineering, Tor44 develops copper-coated projectiles that provide improved ballistic performance, reduced barrel fouling, and enhanced environmental characteristics. For international exhibitions and commercial activities, Leader Munitions and Tor44 present a single, unified catalog.

Within this collaboration:

Leader Munitions supplies standard FMJ projectile cores and cartridge cases from its production lines.

Tor44 provides advanced copper-plated projectile technology as its standard product range. Plated projectiles combine Leader's core manufacturing expertise with Tor44's copper coating technology.

This partnership enables customers to source both traditional FMJ products and next-generation copper-plated projectiles from a single, reliable manufacturing alliance.

MISSION

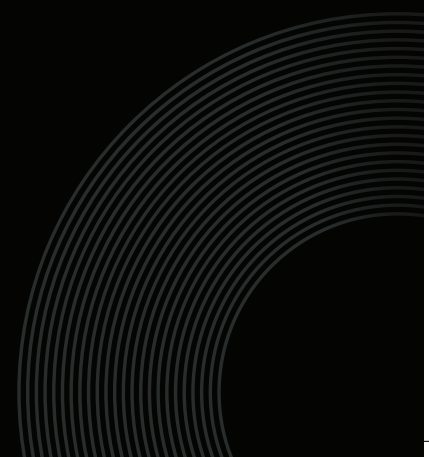

To deliver reliable, high-performance projectile solutions by integrating industrial-scale ammunition manufacturing with advanced copper plating technology, while meeting the highest quality and consistency standards.

VISION

To be recognized globally as a trusted manufacturing partner in projectile and ammunition solutions, driven by quality, innovation, and long-term customer relationships.

AREAS OF ACTIVITY

-  FMJ projectile core production
-  Cartridge case manufacturing
-  Copper-plated projectile technology
-  High-capacity ammo lines
-  Air soft Ammo Production
-  Hunting Ammo Production

BULLETS

FMJ (Full Metal Jacket)

Leader Munition has the capability to produce standard and customized high-precision small caliber FMJ bullets. 9mm, 5.56, 7.62 and other small calibers.

FCP (Full Copper Plated)

Through electrochemical coating, each caliber bullet is produced in a way that is harmless to shooter and environment.

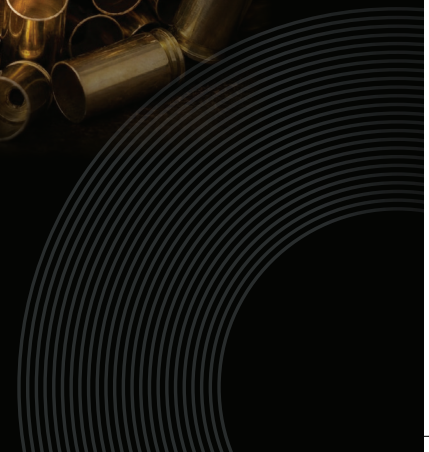

TFMJ (Totally Full Metal Jacket)

Using a new method of electrochemical coating, lead cores are produced that are both more effective and more environmentally friendly than traditional FMJ bullets. Because all surfaces are coated, neither the user nor the environment comes into direct contact with lead.

BRASS CASES

Leader Munitions specializes in the production of standard, custom-made brass cases for small caliber pistols and rifles. 9mm, 5.56, 7.62 and other small calibers.

SLUGS

Leader Munitions manufactures high-precision slugs for PCP rifles in standard or custom caliber weights and shapes. Custom shapes and weights can be quickly processed by Leader Munitions designers. Types include Round Nose, Flat Nose, Hollow Point, Pointed Nose, and others. 4.5mm, 5.5mm, 6.35mm, 7.62mm and 9mm calibers.

AIRGUN PELLETS

Leader Munitions produces high-precision airgun pellets for hobby or sport use, in standard or custom weights and forms. Available in 4.5mm, 5.5mm, and 6.35mm calibers round nose, flat nose, hollow point, pointed nose, and more.

LEAD CORES FOR FMJ BULLETS

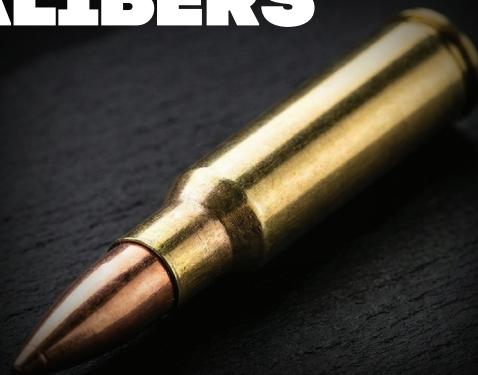

Pure Lead

Leader Munitions, with its pure lead cores used in its high-precision FMJ bullets, as well as its new models with full copper plating, is enabling bullet manufacturers to accelerate production without the need for additional investment. 9mm, 5.56 and 7,62 and others..

MEDIUM AND BIG CALIBERS

Leader Munitions, in addition to its high-precision production of small caliber components, has begun work on components for medium and large calibers. It will soon have stock available for components in 12.7mm, 14.50mm, and 30mm calibers.

Cooperation with  TOR44

COPPER PLATED HUNTING SHOTS

Leadmac Munitions produces shooter-friendly and environmentally conscious full copper-plated leadshot and buckshot in various calibers.
